CLAIMS

What is claimed is:

- 1 1. A golf club head, comprising:
- a body defining a striking face, a top line, a sole, and a back, and having a heel and a
- 3 toe; and wherein:
- 4 said back contains a cavity therein; and
- said cavity contains a plurality of recesses therein, said recesses extending away from
- 6 said cavity.
- 1 2. The club head of claim 1, wherein said recesses are aligned substantially longitudinally
- to said striking face in a heel-to-toe direction, and said plurality of recesses includes a first
- 3 recess positioned in a heel portion of said cavity and a second recess positioned in a toe
- 4 portion of said cavity.
- 1 3. The club head of claim 2, wherein said first and second recesses each have a volume
- 2 from approximately 1 cubic centimeter to approximately 10 cubic centimeters.
- 1 4. The club head of claim 2, wherein said first and second recesses each have a depth of
- 2 approximately 0.300 inch to approximately 0.800 inch.
- 1 5. The club head of claim 4, wherein said first and second recesses each have a depth of
- 2 approximately 0.450 inch to approximately 0.700 inch.

- 1 6. The club head of claim 2, further comprising:
- a first weight member positioned within said first recess; and
- a second weight member positioned within said second recess.
- The club head of claim 6, wherein said first and second weight members each have a
- 2 mass greater than or equal to approximately 10 grams.
- 1 8. The club head of claim 6, wherein said first weight member has a specific gravity
- 2 greater than a specific gravity of the club head, and said second weight member has a specific
- 3 gravity greater than said club head specific gravity.
- 1 9. The club head of claim 8, wherein said first weight member specific gravity and said
- 2 second weight member specific gravity are substantially equal.
- 1 10. The club head of claim 6, wherein:
- 2 said first weight member has a first specific gravity;
- said second weight member has a second specific gravity; and
- 4 said first specific gravity is less than said second specific gravity.
- 1 11. The club head of claim 6, wherein:
- 2 said first weight member has a first specific gravity;
- said second weight member has a second specific gravity; and
- 4 said first specific gravity is greater than said second specific gravity.

- 1 12. The club head of claim 2, further comprising:
- a dampening insert positioned within one of said first and second recesses; and
- a weight insert positioned within the other of said first and second recesses.
- 1 13. The club head of claim 2, wherein said plurality of recesses further includes a third
- 2 recess intermediate said first and second recesses.
- 1 14. The club head of claim 13, wherein said first and second recesses each have a volume
- 2 from approximately 1 cubic centimeter to approximately 10 cubic centimeters, and said third
- 3 recess has a volume greater than each of said first and second recesses.
- 1 15. The club head of claim 13, wherein said third recess has a volume greater than the
- 2 combined volumes of said first and second recesses.
- 1 16. The club head of claim 13, wherein said third recess has a volume greater than twice
- 2 the combined volumes of said first and second recesses.
- 1 17. The club head of claim 13, wherein said first and second recesses each have a depth of
- 2 approximately 0.300 inch to approximately 0.800 inch and said third recess has a depth of
- approximately 0.450 inch to approximately 0.700 inch.
- 1 18. The club head of claim 17, wherein said first and second recesses each have a depth of
- 2 approximately 0.450 inch to approximately 0.700 inch and said third recess has a depth of
- approximately 0.250 inch to approximately 0.500 inch.

- 1 19. The club head of claim 13, further comprising:
- a first weight member positioned within said first recess;
- a second weight member positioned within said second recess; and
- a third weight member positioned within said third recess.
- 1 20. The club head of claim 19, wherein said first and second weight members each have a
- 2 mass greater than or equal to approximately 10 grams, and said third weight member has a
- mass less than approximately 10 grams.
- 1 21. The club head of claim 19, wherein said first weight member has a specific gravity
- 2 greater than a specific gravity of the club head, said second weight member has a specific
- 3 gravity greater than said club head specific gravity, and said third weight member has a
- 4 specific gravity less than said club head specific gravity.
- 1 22. The club head of claim 19, wherein
- 2 said first weight member has a first specific gravity;
- said second weight member has a second specific gravity; and
- 4 said third weight member has a third specific gravity.
- 1 23. The club head of claim 22, wherein said first and second specific gravities are each
- 2 less than said third specific gravity.
- 1 24. The club head of claim 22, wherein one of said first and second specific gravities is
- 2 greater than said third specific gravity, and the other of said first and second specific gravities
- 3 is less than said third specific gravity.

- 1 25. The club head of claim 24, wherein said first and second specific gravities are
- 2 substantially equal.
- 1 26. The club head of claim 24, wherein said first specific gravity is greater than said
- 2 second specific gravity.
- 1 27. The club head of claim 24, wherein said first specific gravity is less than said second
- 2 specific gravity.
- 1 28. The club head of claim 22, wherein said first and second specific gravities are each
- 2 greater than said third specific gravity.
- 1 29. The club head of claim 13, further comprising:
- a first weight member positioned within said first recess;
- a second weight member positioned within said second recess; and
- a dampening member positioned within said third recess.
- 1 30. The club head of claim 29, wherein said first and second weight members each have a
- 2 mass greater than or equal to approximately 10 grams, and said dampening member has a
- mass less than approximately 10 grams.
- 1 31. The club head of claim 29, wherein said first weight member has a specific gravity
- 2 greater than a specific gravity of the club head, said second weight member has a specific
- 3 gravity greater than said club head specific gravity, and said dampening member has a specific
- 4 gravity less than said club head specific gravity.

- 1 32. The club head of claim 1, wherein said recesses are aligned substantially transverse to
- 2 said striking face in a front-to-back direction and extend in a heel-to-toe direction, and
- 3 wherein said plurality of recesses includes a first recess positioned adjacent said back.
- 1 33. The club head of claim 32, wherein said first recess has a volume of approximately 1
- 2 cubic centimeter to approximately 10 cubic centimeters.
- 1 34. The club head of claim 33, wherein said plurality of recesses includes a second recess
- 2 adjacent said first recess, and further comprising a weight member positioned within said
- 3 second recess.
- 1 35. The club head of claim 34, wherein said weight member has a specific gravity greater
- than a specific gravity of the club head, and said dampening member has a specific gravity
- 3 less than said club head specific gravity.
- 1 36. The club head of claim 32, further comprising a dampening member positioned within
- 2 said first recess.
- 1 37. The club head of claim 32, wherein said plurality of recesses includes a second recess
- 2 adjacent said first recess.
- 1 38. The club head of claim 37, further comprising a dampening member positioned within
- 2 said first recess and a weight member positioned within said second recess.
- 1 39. The club head of claim 38, wherein said weight member has a mass of approximately
- 2 10 to approximately 20 grams.

- 1 40. The club head of claim 37, further comprising a weight member positioned within said
- 2 first recess and a dampening member positioned within said second recess.
- 1 41. The golf club head of claim 1, wherein said plurality of recesses includes:
- a first recess aligned substantially transverse to said striking face in a front-to-back
- 3 direction and extending in a heel-to-toe direction;
- a second recess aligned substantially longitudinally to said striking face in a heel-to-
- toe direction and positioned in a heel portion of said cavity; and
- a third recess aligned substantially longitudinally to said striking face in a heel-to-toe
- 7 direction and positioned in a toe portion of said cavity.
- 1 42. The golf club head of claim 41, further comprising:
- 2 a dampening member positioned within said first recess;
- a first weight member positioned within said second recess; and
- 4 a second weight member positioned within said third recess.
- 1 43. The golf club head of claim 41, further comprising a fourth recess intermediate said
- 2 second and third recesses.
- 1 44. The club head of claim 1, wherein at least one of said plurality of recesses includes
- both a weight member and a dampening member positioned therein.
- 1 45. The club head of claim 1, wherein the golf club head is an iron-type golf club head.
